

# TAKE ACTION

## Save money and relaunch your local economy.

Start saving at [mccac.ca](http://mccac.ca)

### Alberta Municipal Solar Program

Receive funding to install solar PV on municipal facilities or land to save on energy costs and reduce your environmental impact. See immediate savings on your electricity bills and reinvest those savings into other priorities across your municipality.

### Recreation Energy Conservation Program

Identify energy-saving opportunities, implement energy-saving projects, and shape healthier lives in your community. Receive funding, up to \$750,000, to upgrade municipal recreation facilities with energy efficient equipment.

### Electric Vehicles for Municipalities Program

Receive funding to reduce the cost of integrating electric vehicles and charging stations in your municipality. Purchase electric ice-resurfacers, garbage trucks, passenger vehicles, and more.

### Municipal Energy Manager Program

Hire an energy manager to develop an energy management plan, find cost and energy saving opportunities, and lead clean energy projects in your municipality. Get 80% of their salary funded by the Action Centre for up to two years.

### Clean Energy Improvement Program

Stimulate the economy and help Albertan's save energy with energy efficiency upgrades and solar installations. Receive support to develop this financing tool for residential and commercial property owners in your municipality.

### Partners for Climate Protection Program

Become a member to get help through a step by step process to implement climate change mitigation strategies. Get expert advice and networking opportunities with other municipalities.
