

LEGISLATIVE ASSEMBLY  
ALBERTA

**Bruce Hinkley, MLA**  
Wetaskiwin-Camrose Constituency

April 10/18

Thank you Tony, for your very passionate letter advocating for solid waste management reform. You are absolutely right on both accounts - nothing has been done for 20+ years and Alberta has fallen to the back of the pack when it comes to waste management.

We have made great strides in many areas which have been neglected for many, many years - infrastructure, labour laws, farm safety, building schools and hospitals.

The carbon levy is already helping with climate leadership programs and green energy production.

I will advocate for improved solid waste management programs - reviewing what is happening and the financial requirements and implications from the 2013 municipality recommendations.

I see you have also sent letters to the Ministers which is a good way to initiate consideration and action.

Take care,

Sincerely,

Bruce H.
